

Aluminum Alloys ■ Zinc Alloys ■ Metal Trading

July 1, 2019

Reference: Conflict Minerals Corporate Statement

Ref: CMRT EICC Rev 5.12

In addition to the EICC Global e-Sustainability Initiative, "Conflict Minerals Reporting Template", Allied Metal Company does not purchase or add any of the four (4) conflict elements to either our aluminum or zinc alloys. Those four minerals (3TG) are:

- Tantalum (TA)
- Tin (SN)
- Gold (AU)
- Tungsten (W)

Our source of raw material for aluminum smelting and alloying is derived from numerous scrap metal processing operations around the United States, including silicon metal from a variety of sources; none from the DRC (Democratic Republic of the Congo) or adjoining countries with common borders.

Likewise, zinc alloy production is completed using SHG zinc from approved LME sources, none of which are derived from the DRC or adjoining countries.

To request the current Conflict Minerals Report, contact:

A handwritten signature in black ink that reads "Mark A. Simpson". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Mark A Simpson, *Director of Operations*
