Restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE). EEE means equipment which is dependent on electric currents or electromagnetic fields in order to work properly and equipment for the generation, transfer and measurement of such currents and fields and designed for use with a voltage rating not exceeding 1,000 volts for alternating current and 1,500 volts for direct current. Linear Technology's Analog Integrated Circuits are neither electrical nor electronic equipment and do not require the "CE" or "CCC" marking.

**Prohibited Substance:** In the IMDS, ILRS, and GADSL lists pertaining to EU Directive on end-of-life material restrictions and RoHS list pertaining to EU Directive – Restriction of the use of hazardous substances in electrical and electronic equipment, these substances are prohibited above the specific threshold reporting limit (0.1% unless otherwise listed). Possible substances and restrictions:

Substance	CAS	Class	Threshold
Cadmium (Cd)	7440-43-9	D/P	0.01% (any intentionally introduced content must be reported)
